\* The index value in this table (last column) represents the ratio of the state's actual match amount to the calculated "required" match amount as directed by PATH regulations (3:1). Thus, an index of 1.00 means that the state has met its requirement of matching one dollar for every three Federal dollars. An index above 1.00 means that the state has exceeded its requirement. N/A = Not applicable. Territories were exempted from the state match requirement.
